DESCRIPTION

The AML/E series of Standard LVDT Displacement Transducers can be AC or DC powered and are widely used in OEM and general purpose applications such as material testing machines, automotive/aerospace test rigs and actuators, etc.

They are supplied in a variety of packaging formats, enabling engineers to select quickly and precisely, the product required for a particular application.

The AML/E is supported with a versatile range of instrumentation to enable engineers to implement the sensor with the minimum of fuss within a system. Supporting instrumentation includes trip amplifiers, indicators, PC interfaces, rack systems, etc.
