TORQUE SENSOR

YDS
Series

- Torque Ranges 0.2Nm to 20Nm
- 0.5% Accuracy Class
- Suitable for continuously rotating applications
- Up to 3000rpm
- 3 YEAR WARRANTY

Options Available

Customer-specific measuring ranges

Supplied With Any Instrumentation and Calibrated as a Complete System with Traceable Certificate

Description:

The YDS torque sensors are designed for low torque applications on continuously rotating equipment. They feature high accuracy and excellent long term stability. Typical uses include industrial applications motors, pumps and automotive components.

The YDS series can be further complimented by any of our range of instrumentation to offer a completed system, supplied and calibrated from a single supplier.
